The Kiddle

Where curiosity grows through play and creativity

Jungle Explorer Adventure

A Note for Parents:
In this edition, your **kiddler** will build early skills in fine motor control, sequencing, phonics, imagination and logical thinking through coloring, dot-to-dot, sound play, riddles, experiments and much more.

Color & Connect The Dots
Sit together, guide gently, and celebrate effort.

Logic Time
Let them try first—offer hints if needed.

Phonics, Story Building & Experiment
Practice sounds through play, then explore the experiment together—encourage your child to imagine and get creative.

Fun Fact
Have a quick chat—spark curiosity.

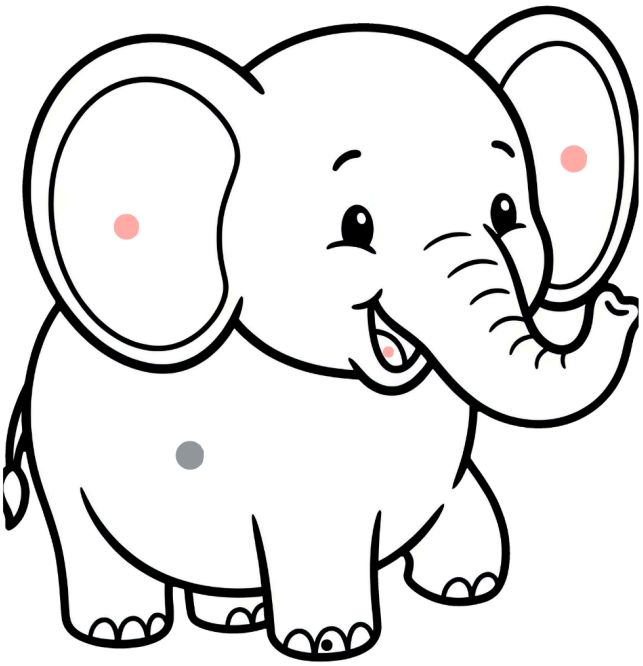
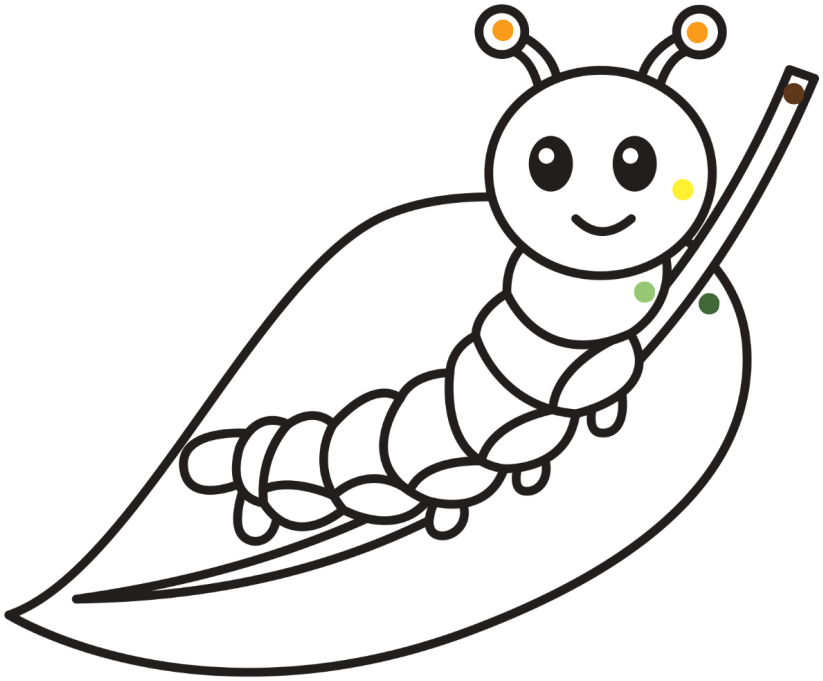
Color It In!

Match the colors and fill the picture.





© 2026 The Kiddle | www.thekiddle.com

Connect the Dots!

Connect the dots in order and discover the shape!

Logic Time!

Circle the right answer:

I have 4 legs, I say 'Woof!' and I love to fetch sticks. What am I?

I am black and white, I live in cold icy places, and I cannot fly. What am I?

I have 8 legs, I spin webs, and bugs get stuck in them. What am I?

Circle the one that does NOT belong:

📚 Learning of the week!

Sound of the Week: “AT”

Say it together: “Aaa-t… AT!”

Silly rhyme - Clap every time you hear an AT word!

The fat cat sat on a mat — just like that!

Feed the Hungry Lion 🦁

The lion is VERY hungry. But he only eats “AT” sound food! Circle what ends with “AT”?

🐱	🐶	🦇	🐟	🐀

🏃 The Lost Monkey's Adventure

Today we will read and complete (draw or write) a story about our little friend Jumpy

One sunny day, a little monkey - **Jumpy** was jumping from tree to tree in the jungle. 🌿
He was looking for his favorite yellow bananas. 🍌
But suddenly… he realized he was lost! 😮

The trees looked the same, and the jungle was very quiet.
Just then, he met a friendly _____ (animal).
"Don't worry!" said the _____. "I will help you!"

They walked past a big _____ (place/object).
Oh no! A _____ (animal) was blocking their way!

The monkey felt _____ (feeling).
But then, he had an idea! 💡

He _____ (action), and finally found his way home! 🏡

🧪 Experiment of the week!

Imagine a tiny jungle pond where lots of little ants are floating on leaves. When a soapy monkey finger touches the pond…the ants RUN AWAY!
Let's see how!

What You Need:

- *Plate*
- *Water*
- *Black pepper powder (imagine as ants)*
- *Dish soap*

What To Do:

1. *Fill plate with water (this is your jungle pond)*
2. *Sprinkle pepper powder on top (your tiny jungle ants)*
3. *Dip finger in soap*
4. *Touch the water (you are the soapy monkey!)*

What Happened?

BOOM — ants run away!

Why?

Water has an invisible skin that holds the pepper (parents - it's the surface tension ;)). Soap breaks it—so the pepper — oops, ants — run away!

🏃 Time to move!

Pretend you're an explorer in the jungle! Follow the steps and get moving!

Frog Jumps: Jump up and down 10 times shouting 'Ribbit!'
Butterfly Flap: Stand still and flap your arms up and down like wings for 20 seconds!
Elephant Stomp: Stomp your feet like a big elephant—10 stomps each!

🌟 Did You Know?

Butterflies taste with their FEET!

They have special taste sensors on their tiny feet so they can tell if a leaf is good to eat just by standing on it!

Great Job!

You explored, learned, and played today — that's amazing! See you again for more fun...
